

EDUCATION	Nanjing University Computer Technology (Non Degree Awarded)	Nanjing, Jiangsu, China Sep. 2023 – Sep. 2024
	Shandong University B.Eng. in Computer Science and Technology	Jinan/Qingdao, Shandong, China Sep. 2019 – Jun. 2023
ACADEMIC EXPERIENCE	The University of Texas at Dallas <i>Remote Research Intern (Supervisor: Prof. Xiaohu Guo)</i> Topic: Reconstruct mesh from SDF by training a neural network to optimize the sample positions and radii. Responsibilities: Algorithm design; Prototyping; System implementation; Empirical analysis.	Dallas, Texas, USA Aug. 2024 – Present
	Nanjing University <i>Graduate Student (Supervisor: Prof. Ruoyu Yang)</i> Studied physics simulation: Incremental Potential Contact; Yarn-level Cloth; Iterative Methods.	Nanjing, Jiangsu, China Feb. 2024 – July. 2024
INDEPENDENT PROJECTS	Physics Based Renderer C++ Feature: ray tracing; diffuse, metal, dielectrics materials.	2024
	Material Point Methods (MPM) for Snow Simulation C++, CUDA <i>Achieved a GPU-accelerated realistic 3D snow simulation by implementing MPM with CUDA.</i> Features: PIC, FLIP, APIC; BSpline interpolation; Explicit integration; Real-time, offline rendering.	2024
	Incompressible Eulerian Fluid Simulation C++ <i>Achieved a realistic 2D smoke simulation in free air using the Eulerian method.</i> Features: Semi-Lagrangian advection; Marker-and-cell method; Incompressible assumption.	2024
	Finite Element Method & Mass-spring System for Elastic Simulation C++ <i>Achieved a interactive elastic 3D simulation without contact</i> Features: Semi-implicit integration, Newton's method for optimization; High-resolution rendering for low-resolution simulation via skinning.	2024
	Geometry Modeling and Processing Algorithms Implementation C++, Houdini Topics: <i>Poisson surface reconstruction</i> on a regular grid; <i>Registration</i> using rigid matching; <i>Heat method</i> for geodesic distance estimation; Basic discrete exterior calculus operators on triangle mesh.	2024
	Metamorphic Testing of Satisfiability Modulo Theories (SMT) Solvers Python <i>Reproduced results from two relevant top papers in a unified way by implementing the automatic testing code where the core component is an interpreter of a domain-specific language (DSL) I designed.</i>	2023
SKILLS	Programming: C/C++, Python, CUDA; CMake, Git. Software & Library: Blender, Houdini; Eigen, libigl, CGAL, PyTorch.	
SERVICES	Transgender Community Support <i>Volunteer, Editor of ftm.wiki & mtf.wiki</i> (1) Raised funds for a non-profit that advanced a more transgender-inclusive law; (2) Made hard-to-find domestic transgender-healthcare information more accessible.	Online, China Oct. 2021 – Present
	Winter Computer Science Course for Women <i>Organizer, Lecturer</i> Designed a more accessible and attractive material for female students from non-science background. It received positive feedback and inspired more students to study CS.	Online, China Jan. 2021 – Mar. 2021
	Network Management Committee <i>Student Member</i> Communicated with diverse people and staff to identify and resolve network issues.	Qingdao, Shandong, China Oct. 2020 — Dec. 2021

HONORS AND AWARDS	Academic Scholarship (top 10% & 15%)	2020 – 2024
	<i>Shandong University & Nanjing University</i>	
	First Prize, Provincial (top 2%)	2021
	<i>Contemporary Undergraduate Mathematical Contest in Modeling</i>
